1 Introduction

1.1 Purpose

The purpose of StudentHub is to provide a platform by students for students. Its objective is to streamline the management of student life. The platform will allow students to manage their tasks and organise their study sessions. The platform will also provide a space for students to connect with each other, share resources and collaborate on projects. The platform will also offer students a network forum where they can make announcements to find used books and private lessons, as well as share information about school events.

1.1.1 Goals

ID	Description
G1	Allow users to create, delete, log in to and log out from an account
G2	Enable users to create, edit, move, and delete deadlines on a shared calendar
G3	Provide functionality for users to create, edit, and delete private deadlines visible only to themselves
G4	Allow users to upload, share, edit, and delete study notes on various subjects
G5	Enable users to create, manage, and delete study groups with other platform users
G6	Provide a messaging system for communication within study groups
G7	Allow users to send and receive study group invitations
G8	Provide a forum where users can create, edit, and delete announcements
G9	Enable users to comment on and interact with forum announcements
G10	Allow users to search for specific topics, notes, or announcements within the platform
G11	Provide a marketplace functionality for exchanging used academic books
G12	Enable users to offer and search for private tutoring lessons
G13	Allow users to create and share information about upcoming school events
G14	Provide notification functionality for deadline reminders and forum activity
G15	Enable users to customize their profile and privacy settings

Table 1: Goals

1.2 Scope

1.2.1 World Phenomena

ID	Description
WP1	A student wants to create an account
WP2	A student wants to delete an account
WP3	A student wants to create a deadline on the calendar
WP4	A student wants to move a deadline on the calendar
WP5	A student wants to create a private deadline on the calendar
WP6	A student wants to delete a deadline on the calendar
WP7	A student wants to share his/her notes on a given subject
WP8	A student wants to delete his/her shared notes
WP9	A student wants to create a studying group
WP10	A student wants to invite people to his/her studying group
WP11	A student wants to chat with his/her studying group
WP12	A student wants to delete his/her studying group
WP13	A student wants to publish an announcement on the forum
WP14	A student wants to edit an announcement on the forum
WP15	A student wants to delete an announcement on the forum
WP16	A student wants to comment an announcement on the forum
WP17	A student wants to delete a comment on the forum
WP18	A student wants to share an announcement found on the forum

Table 2: World Phenomena

1.2.2 Shared Phenomena

ID	Description
SP1	The system provides a registration form for new users
SP2	The system validates user credentials during login
SP3	The system displays a calendar with all deadlines accessible to the user
SP4	The system notifies users about upcoming deadlines
SP5	The system allows uploading and storing study materials in various formats
SP6	The system provides a search function for finding specific notes or resources
SP7	The system displays a list of available study groups to join
SP8	The system delivers notifications about new study group invitations
SP9	The system provides a chat interface for communication within study groups
SP10	The system displays forum announcements sorted by category and recency
SP11	The system notifies users when their announcements receive comments
SP12	The system provides a form for creating and editing announcements
SP13	The system displays a marketplace section for book exchange offers
SP14	The system provides a mechanism for filtering tutoring offers by subject
SP15	The system allows users to respond to announcements via direct messaging
SP16	The system provides a dashboard displaying relevant activities and notifications
SP17	The system allows users to customize notification preferences
SP18	The system provides mechanisms for reporting inappropriate content
SP19	The system confirms successful completion of user-initiated actions
SP20	The system provides access to shared resources based on user permissions

Table 3: Shared Phenomena

1.3 Revision History

- Version 1.0 - May 4, 2025 - Initial release of the document.

1.4 Document Structure

This document is structured into 6 sections, each containing subsections that provide detailed information about the system. The sections are as follows:

- **Introduction:** This section provides an overview of the system, its purpose, and goals.
- **Overall Description:** This section describes the system's context, stakeholders, and shared phenomena.
- **Specific Requirements:** This section outlines the specific requirements for the system.
- **Hours Worked:** This section provides a summary of the hours worked on the project.
- **References:** This section lists any references used in the document.

2 Overall Description

2.1 Product Perspective

2.1.1 Scenarios

Scenario 1: An user creates an account and manages his own deadlines

Elir, a first-year Computer Science student, creates an account on StudentHub using his university email. After verification, he adds three academic deadlines to the Calendar: a Programming assignment, a Mathematics exam, and a group project meeting. He marks the group project as "shareable" for future teammates. Marco also adds a private reminder to call home on the weekend. Later, when his Programming assignment deadline is extended, Marco easily updates it in the system.

Scenario 2: An user creates an announcement on the forum

Davide T., an Economics student, searches StudentHub's Forum for a specific Econometrics textbook. Not finding it, he creates an announcement requesting "Advanced Econometrics by Greene - 7th Edition" with his budget. Two days later, Sofia comments on his post offering to sell her copy. They arrange the exchange through direct messaging and meet at the university library. Paolo then marks his announcement as "Resolved" with a thank-you note.

Scenario 3: An user creates a study group and shares notes

Pantarotto A., a Biology student, uploads her Cell Structure notes to StudentHub's "Study Resources" section with relevant tags. She then creates a "Biology Midterm Prep" study group, making it discoverable to other Biology students. Elena invites five classmates, three of whom accept immediately. Through the group chat, she shares her notes and the team plans their study sessions for the upcoming midterm.

2.2 Domain Model

TODO: to be done
